### ABOUT

Fullstack developer with 3 years of experience passionate about creating innovative solutions. Currently working at Elevaty, a branch of Dock's holding company, where I am responsible for developing fullstack applications for the company's offered solutions. In addition to Elevaty, I built Marquee, a scheduling and management system for clinics. My journey in technology began early. At 16, I automated my parents' house using Arduino and C programming. This passion for development led to create various projects, such as home automation applications sold online, including an app to control the gate motor via Wi-Fi and a smart mirror programmed in Python that was featured in the local [newspaper](#).

### PROFESSIONAL EXPERIENCE

#### FullStack Developer – Elevaty

05/2023 – Present07/2022

- FullStack development of React components for the frontend, utilizing APIs and SQL.
- Built a new frontend for the invoice processing system in 3 months.
- Actively collaborated in all product cycles following agile methodologies

#### Freelance Front-End Developer

05/2023 – Present07/2022

- Development of websites and fullstack systems using ReactJS, JavaScript, CSS, HTML, Node.js, SQL, and AWS.
- Main Projects:

- **Love & Life:** <https://amorevida.org/>
